- Vegetables and vegetable purees credit on volume served. Tomato paste and puree credit as a calculated volume based on the yields in the FBG.
- At least ⅛ cup of recognizable vegetable is required to contribute toward a specific vegetable subgroup.
- Pasta made from vegetable flour(s) may credit as a vegetable even if the pasta is not served with another recognizable vegetable.
- The other vegetable subgroup may be met with any additional amounts from the dark green, red/orange, and beans/peas (legumes) vegetable subgroups.
- Program operators may offer any vegetable subgroup to meet the total weekly requirement for the additional vegetable subgroup.
- Raw leafy green vegetables credit as half the volume served in school meals (example: 1 cup raw spinach credits as ½ cup dark green vegetable).
- Legumes may credit toward the vegetables component or the meat alternates component, but not as both in the same meal. The Program operator will decide how to incorporate legumes into the school meal. However, a manufacturer should provide documentation to show how legumes contribute toward the vegetables component and the meat alternates component.
- The PFS for meats/meat alternates may be used to document how legumes contribute toward the meat alternates component.
